PPC Advertising

Pay Per Click advertising is one of the most widely known and used forms of online advertising.

Advertisers are able to choose the keywords they would like to target and set the amount of money they will pay on a per click basis.

Advertisers usually bid against other advertisers which can greatly inflate the cost for popular keywords.

PPV/CPV Advertising

PPV/CPV is an online advertising model that displays advertisements in either a pop-up, pop-under or interstitial ad. Advertisers are charged on a per view basis.

PPV/CPV is generally perceived as interruption marketing, as a result click-through rates are usually low. Despite that fact CPV is a favorite advertising method for many top affiliate marketers and brands.

Self-Serve Advertising Networks

Mainly we will be talking about Media Buys and Display Advertising. Most of these sources allow you to start with an initial deposit of \$100 or less and are a good place to start.

In-Text Advertising

In-text advertising is a form of online advertising where specific keywords within the text of a webpage are matched with advertisers who are looking for traffic relating to the specific keyword.

Retargeting or Remarketing

Retargeting is a form of targeted online advertising that delivers ads to consumers based on previous Internet actions.

An example would be if you visited Amazon to look at a specific item and then later in the day seeing an Amazon ad for the product you were looking at on a different website. That is Retargeting.
